Kaiserslautern 67659, Germany | Student Visa (Authorized to work in Germany) | +49 15252898223 | preethivhiremath.vh25@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Backend engineer with 2+ years at Deutsche Bank, promoted to Senior Analyst in 15 months, cutting memory usage by **95%** via microservices migration. Applied ML: trained neural network models, prepared datasets, integrated LLMs (Gemini 2.5 Flash). Open-source: **SnitchLint** (VS Code OWASP scanner, 500+ installs) and **BrainSurf** (PyPI EEG library). Seeking Werkstudent in Java, Spring Boot, Python, or ML.

AWARDS AND CERTIFICATIONS

- Individual Excellence Award | Deutsche India Pvt Ltd (Deutsche Bank)March 2025
- DB NextGen Engineer | Deutsche India Pvt LtdMay 2024
- Prompt Engineering for Developers | Deutsche Bank x Google Cloud Gen AI Program, system instructions, prompt design2025

TECHNICAL SKILLS

Languages	Java, Python, C/C++, SQL (MySQL, Oracle), JavaScript, TypeScript, XML, JSON, Sass
ML and AI	TensorFlow, Keras, NumPy, scikit-learn, LSTM, large language models, prompt engineering (Gemini 2.5 Flash, system instructions, model configuration)
Frameworks	Spring Boot, Node.js, Flask, Django, Express.js, React.js
DevOps	Git, Docker, Kubernetes, Jenkins, TeamCity, Postman, REST APIs, SOAP
Cloud and OS	Google Cloud Platform (GCP), Linux (SUSE, RHEL 9)
Practices	Microservices, TDD/BDD, ETL pipelines, data modelling, Agile (Scrum/Kanban), SOLID design patterns

EXPERIENCE

- Senior Analyst (Software Engineer) | Deutsche India Pvt Ltd – Deutsche BankOctober 2024 – March 2025
 - Migrated legacy Java and C++ backends to **Spring Boot microservices**, cutting memory usage by **95%** and eliminating race conditions under peak APAC, US, and EMEA traffic.
 - Engineered a **real-time data synchronisation system** using **Oracle AQ** message queuing, delivering sub-second UI updates and zero-drift reconciliation for customer-facing financial systems.
 - Designed and maintained **RESTful and SOAP APIs** with Spring Boot; enforced **TDD/BDD** testing coverage that reduced defect rate by 30% and became the team standard across 5 services.
 - Led **OS migration from SUSE Linux to RHEL 9**, resolving toolchain incompatibilities across 8 critical build pipelines.
 - Acted as Subject Matter Expert for components serving **APAC, US, and EMEA**, maintaining high-availability SLA for 3 customer-facing financial systems.
- Graduate Analyst | Deutsche India Pvt Ltd – Deutsche BankJuly 2023 – October 2024
 - Optimised complex Oracle SQL using Global Temporary Tables (GTT), stored procedures, triggers, and user-defined types, improving query execution time by **20%+** across 12 high-volume transaction processing services.
 - Designed and maintained **ETL pipelines** for financial transaction processing, integrating 6 upstream/downstream systems with reconciliation logic ensuring thread safety in concurrent environments.
 - Contributed to **Oracle Exadata (ExaCC) cloud migration**: schema enhancements and performance tuning reduced average query latency by 15%.
- Web Development Intern | Luxveda Brand Services LtdApril 2023 – June 2023
 - Built Node.js backend services with MQTT-based messaging, enabling real-time communication across 50+ distributed IoT devices with under 100ms latency for Praan air-quality hardware.

EDUCATION

- Rheinland-Pfälzische Technische Universität (RPTU)April 2026 – Present
- M.Sc. Informatik | RPTU Kaiserslautern | Specialisation: Intelligent Systems and Software Engineering
- B.M.S College of Engineering, BangaloreAugust 2019 – July 2023
- B.E. Information Science and Engineering | GPA: 9.19 / 10.00

PROJECTS

- SnitchLint | VS Code Security Extension | TypeScript, AST, ESLintJune 2025 – Present
 - Published VS Code extension for **static security analysis** of JavaScript and TypeScript: AST-driven scanning engine with an extensible rule registry detects **OWASP Top 10 vulnerabilities** in-editor; 500+ installs on the VS Code Marketplace.
- BrainSurf | Python, NumPy – Open-Source EEG Analysis LibraryJanuary 2023 – July 2023
 - Published pip-installable **Python library on PyPI** for EEG signal processing: bandpass filtering, epoch extraction, feature extraction, and a no-code app for cognitive neuroscience experiments.

LEADERSHIP AND ACTIVITIES

- Financial Inclusion Hackathon (24h) | Deutsche Bank2025
 - Built and deployed an end-to-end application in 24 hours: containerised services on **GCP with Docker**, integrated **Gemini 2.5 Flash** with system prompt engineering for document analysis, delivering personalised insurance recommendations for 3 user profile categories.
