Awards and Certifications

Individual Excellence Award | Deutsche India Pvt Ltd (Deutsche Bank) March 2025
Prompt Engineering for Developers | Deutsche Bank x Google Cloud Gen AI Program 2025

Technical Skills

Languages Java, Python, SQL, JavaScript, TypeScript, XML, JSON
Backend Spring Boot, Node.js, Flask, Django, Express.js, REST APIs, SOAP
Database Oracle (GTT, stored procedures, triggers, UDTs), MongoDB, MySQL, SQL Server
DevOps Docker, Git, Jenkins, TeamCity, Kubernetes
ML/Data TensorFlow, Keras, scikit-learn, NumPy, LSTM, signal processing (ICA, Wavelet)
Cloud/OS Google Cloud Platform, Linux (SUSE, RHEL 9), Oracle Exadata
Practices Microservices, TDD/BDD (JUnit, Mockito), Agile (Scrum), ETL pipelines, SOLID patterns, MS Office tools

Experience

Senior Analyst (Software Engineer) | Deutsche India Pvt Ltd – Deutsche Bank October 2024 – March 2025
– Migrated legacy **Java/C++** backends to **Spring Boot microservices**, cutting memory usage by **95%** and eliminating race conditions under peak APAC, US, EMEA traffic (10k+ concurrent users).
– Engineered **real-time Oracle AQ messaging system** delivering sub-second UI updates, 99.9% uptime on mission-critical financial platforms (zero-drift reconciliation for 6+ systems).
– Designed **RESTful and SOAP APIs** with Spring Boot; enforced **TDD/BDD** (JUnit, Mockito) reducing defect escape rate by 30% across 5 production services.
– Led **SUSE Linux to RHEL 9 migration** resolving toolchain incompatibilities across 8 critical build pipelines.
– Subject Matter Expert for 3 mission-critical financial trading/settlement systems serving APAC, US, EMEA regions.

Graduate Analyst | Deutsche India Pvt Ltd – Deutsche Bank July 2023 – October 2024
– Optimized complex **Oracle SQL** using GTT, stored procedures, triggers, UDTs – improved query execution by **20%+** across 12 high-volume transaction processing services (50k+ transactions/hour).
– Designed **ETL pipelines** integrating 6 upstream/downstream systems with custom data transformation and reconciliation logic; ensured thread-safe concurrent processing.
– Contributed to **Oracle Exadata (ExaCC) cloud migration**: schema enhancements and SQL tuning reduced query latency by 15%.

Web Development Intern | Luxeveda Brand Services Ltd April 2023 – June 2023
– Built **Node.js backend services** with MQTT messaging for 10+ distributed IoT devices, achieving sub-100ms latency.
– Designed **REST APIs** for device scheduling, maintenance tracking, and real-time data ingestion.

React Developer Intern | Inovact Pvt Ltd August 2021 – November 2021
– Built 15+ responsive **React.js** components using hooks and state management; reduced page load by 20% via code-splitting and lazy-loading.
– Collaborated with designers and backend engineers translating UI/UX wireframes into functional, scalable interface features.

Education

M.Sc. Informatik (Intelligent Systems & Software Engineering) | Rheinland-Pfälzische Technische Universität (RPTU), Kaiserslautern April 2026 – Present
B.E. Information Science and Engineering | B.M.S College of Engineering, Bangalore | August 2019 – July 2023
GPA: 9.19/10.00

Projects and Research

BrainSurf | EEG Signal Processing Library | Python, TensorFlow, Keras, scikit-learn Jan 2023 – July 2023
– Published open-source library on PyPI for cognitive neuroscience research; preprocesses multi-channel EEG with ICA (Independent Component Analysis) and Wavelet filtering (80% time reduction vs. manual preprocessing).
– Trained binary classification model (scikit-learn, 5-fold cross-validation) predicting cognitive states from EEG; achieved 80%+ accuracy using feature engineering and statistical testing (Welch’s t-tests).
– Built Streamlit web application for real-time EEG visualization, preprocessing, and model inference.

SnitchLint | VS Code OWASP Security Scanner | TypeScript, AST, ESLint June 2025 – Present
– Published VS Code extension for static security analysis of JavaScript/TypeScript using AST parsing; detects OWASP Top 10 vulnerabilities (XSS, SQLi, SSRF, weak crypto, secrets, command injection).

Financial Inclusion Hackathon | Deutsche Bank | React, Java, Docker, GCP, Gemini 2.5 Flash 2025
– Built end-to-end ML application in 24 hours: **React frontend**, containerized **Java/Python backend** on GCP with Docker, integrated **Gemini 2.5 Flash LLM** with system prompt engineering for document analysis, delivered personalized insurance recommendations for 3 user categories.

Seq2Seq Language Translator | Python, Keras, LSTM 2023
– Designed and trained character-level Seq2Seq model using LSTM neural networks for English-to-French translation on 10,000 sentence pairs; optimized training pipeline with vectorization and one-hot encoding.

RoamTogether | Travel Planning Application | Flutter, Node.js, Express, MongoDB 2022 – 2023
– Built responsive cross-platform mobile app for collaborative travel itinerary planning; designed REST API endpoints, integrated MongoDB Atlas with Mongoose for nested data structure management.
